

Velo City Rider Fit Samples

To help assist in the ordering process, Patapsco Bicycle has a complete set of fit samples available.

The Velo City Riders collection contains a wide assortment of products to allow members to choose their individual style and fit. These ranges are consistent throughout each collection, but garments fit differently based on their cut, construction and fabrics. In general, questions arise on the cut of the jerseys, as short fit is consistent between cuts. However, the cut and fabric in jerseys provide different fit within the same size range.

Available:

Men's and women's Squad One Jerseys

Men's and women's Split Zero Jerseys

Athlos Fit Samples

Element Protection Outer Garments Race Cut

Weather protection gear is designed to lay close to the body to protect you from the elements and maintain body temperature.

If you are purchasing "Race Cut", Split Zero, this should match your jersey size. If you are purchasing "Club Cut", Squad One, we recommend you order 1 size larger.

Accessories

Arm Warmers

As a rule of thumb your arm warmers are the same size as your jersey size, unless you spend a lot of time working on your gun show. 😊

Knee and Leg Warmers

Knee and leg warmers should be ordered as the same size as your shorts or bib-short size.
